

# Fireworks MX 2004

## Syllabus

---

### **Description:**

Discover the terminology and concepts necessary for discriminating use of equipment, software and images in the digital world. Using Fireworks software, learn to edit and enhance digital photographs. Develop your own images, buttons, text, fills, and live effects to graphically enhance your Website and learn keys for optimizing your graphics for the most efficient Web application.

### **Prerequisites:**

Basic computer skills

### **Objectives:**

Upon completion of this course participants will be able to:  
Use Fireworks to create and edit graphics for websites.  
Edit, enhance and prepare digital photographs.  
Create Buttons, Logos, and Titles.  
Use Fireworks drawing tools.  
Apply strokes, fills, and live effects.  
Optimize graphics for fast downloading

### **Things to Bring:**

Optional: bring digital photos with which to practice (otherwise, samples will be provided).
